

A complete range of Internet, LAN & WAN services for converged networking

## activeNETWORKS™ Portfolio at a Glance

### Converged Network Solutions

#### **Active Directory® Backup “With 3 easy steps to recover after disaster”**

A cloud-based backup and restore solution for your “Active Directory” with a guaranteed recovery time objective of minutes, allowing you to increase the SLA of the datacentre in no time. As well as AD backup and recovery, it also offers full restoration of essential dependent services such as PKI, DHCP and DNS.

- Ensure uptime for your Active Directory®

#### **Internet Access “Superfast Internet and site to site connectivity”**

A full range of Internet access circuits including ADSL, EFM (Ethernet First Mile), FTTC (Fibre To The Cabinet) and Fibre Ethernet circuits. We also provide Ethernet for long distance national and international circuits straight to your branches, headquarters, data centre, or DR site. Whether you need point to point, VPN, or MPLS – activereach can design, provide, and supply. We offer SLAs, failover options and the lines are proactively monitored 24/7.

- Access to the UK’s best Internet coverage and capacity

#### **Local Area Networking “Leveraging our experience & expertise”**

Strong partnerships with leading network infrastructure manufacturers, together with extensive experience in the design and implementation of wired and wireless LAN solutions, gives activereach unrivalled expertise in this area. In every case, we offer best-practice design and build based on the recommendations of major technology vendors, enabling businesses to enhance productivity and realise cost savings.

- Implement cost-effective, highly secure & scalable solutions

#### **Wide Area Networking “Expert advice on best of breed solutions”**

Our WAN networks are built using a diverse range of technologies from a carefully selected range of Carriers (including Tier 1 Carriers such as BT, TalkTalk Business, and Global Crossing) that we utilise for specific builds based on evenly balanced geographical, price and performance merits. Deployed technologies include ADSL, EFM, E1/T1, Fibre Ethernet and also IPSEC VPN over 3G. Our IPVPNs can be deployed as end to end MPLS, or as private leased line / IPSEC VPNs over Internet hybrids.

- Optimise network security, resilience and performance

### Email and Web Security “100% service availability SLA”

Our email and web security solutions reduce costly downtime associated with email-based spam, viruses, and web threats, as well as mitigating against spear-phishing attacks. They are available in a variety of form factors, including on premise appliances, cloud services, and hybrid security deployments with centralised management.

- Protect your email data and users from web-based threats

### Voice PBX Gateways “Low-cost, feature-rich voice services using VoIP”

activereach designs, supplies, configures and supports PBX devices for sites of all sizes. An IP-native PBX and gateway enhances small and medium businesses with advanced telephony features – leveraging their data networks and integrating with their existing telephony estate. activereach is the perfect partner for IP telephony deployments up to 500 handsets and beyond.

- Reduce communication costs & enhance productivity

### IPv6 Network Audit “Understand your network readiness”

Many organisations become bogged down in tracking the changes they need to implement for successful adoption of IPv6. To make your migration as smooth as possible, activereach provides a comprehensive IPv6 network audit covering Internet connectivity, networking hardware, branch office connections & remote access, email, DNS, workstations, servers & printers, and DHCP services.

- IPv6 compliance and hassle-free migration

## TESTIMONIALS

*“When I joined The Marketing Store, it was clear from day one that we were having day-to-day network issues. So we asked activereach to manage and maintain our European network. activereach joined us a consultative partner and helped work through the issues, document the network properly and provide a stable European network. With activereach, I just don’t have to worry. They’re a trusted partner and I can leave them to get on with the job.”*

**Jean-Paul Faiers Head of IT Europe, The Marketing Store Worldwide**

*“Every time we go to activereach they have a solution for our requirements. We started with Exchange hosting and cloud AV/anti-spam for our multi-site network. They continued to offer great advice and a thorough implementation, explaining what they are doing all the time. We have just been through database centralisation for 50+ sites and again they took a general idea and turned it into practice. Great work!”*

**Kevin Jezzard Director of IT, Carewatch Care Services Limited**
