

Supercharge Your Security Operations

08:30 **Registration & Introductions** — First Floor Exhibition Area

09:00 **Welcome** — Moss and Campbell Rooms
Ash Hussain, Sales Director, activereach

Speed and Precision: The Keys to Stopping Modern Adversaries
Technology Highlight: Endpoint Detection and Response (EDR)

Defending against modern adversaries requires the ability to detect and to understand threats quickly, and to respond decisively. CrowdStrike's experts fight and win these battles every day, and have one of the industry's most comprehensive pictures of today's top cyber threats. Join CrowdStrike for a deep dive into global observations and trends, and real-world intrusion case studies, delivering deep insights on modern adversaries, and their tactics, techniques, and procedures (TTPs).

09:15 Attendees will come away understanding:

- Why "speed" is the new critical metric in cybersecurity
- How organizations are using the MITRE ATT&CK framework to shorten the time to investigate and understand threats.
- Trends in adversary tradecraft, as seen across 1000s of real-world intrusion attempts.
- Action plans that you can use to ensure your organization is ready to anticipate and defend against the most dangerous threats of tomorrow.

Tristan Elder, Senior Director EMEA Alliances, and Dilan Nathoo, Sales Engineering Manager, CrowdStrike

Optimising Security Operations in a Cloud-First World: Securing all Clouds with Next Gen Secure Web Gateway and CASB
Technology Highlight: Cloud Access Security Broker (CASB)

Rethink Your Security Architecture to Tackle the Latest Threats Hiding Behind the Cloud

10:00 Moving data and applications to the cloud is a key element of the digital transformation process, however this trend has led to a new concept of perimeter: corporate data is no longer on-premise and can be accessed by users connecting from anywhere with personal or corporate devices. As a consequence a shift in the security paradigm is needed to tackle the new threats hiding behind the cloud. Starting from a revised model of the cyber kill chain, this session will show how it is possible to secure the journey to the cloud with a single cloud-native security platform.

13:30 **Lunch** - First Floor Exhibition Area

14:30 **Driving Briefing**—Moss and Campbell Rooms

15:00 **Driving Experience**

F1 Simulator Zone
Driver Simulator Zone

Mercedes AMG Driving *
Brooklands Handling Circuit

Compete to set the fastest lap time on ultra-realistic F1 driving simulators. Trophies and prizes awarded for the most impressive individual and team performances.

With expert one-to-one guidance from a Driving Specialist in the passenger seat, experience the thrill of driving on the Handling Circuits, Dynamic Straight and low friction surfaces.

17:00 **Prize Giving & Drinks Reception**—F1 Podium / 1907 Bar
